## PROFILE

I'm a freelance Full-Stack Developer with 4 years of experience, specializing in web and mobile development. I focus on building robust applications using Laravel, React Native, and modern API architectures, delivering clean, scalable solutions from backend to frontend.

## SKILLS

- Laravel
- Livewire
- React
- React Native
- REST API
- Node.js
- MySQL
- HTML/CSS
- JavaScript
- Bootstrap
- Tailwind CSS
- TypeScript
- NextJS

## WORK EXPERIENCE

### FULL STACK WEB DEVELOPER / MOBILE DEVELOPER

Connict IT Solutions and General Merchandise Corp.

October 2023 - April 2025

- Spearheaded the development and deployment of mobile and web applications, utilizing technologies such as Laravel (Livewire, Livewire, Alpine.js, Tailwind) and React Native to deliver scalable and performant solutions.
- Architected and implemented secure, efficient backend systems, including real-time data synchronization, QR code scanning, and role-based access control.
- Optimized application performance, resulting in improved user experience and reduced response times.

#### Key Projects:

- **Student Attendance System (OLSIS)** - Developed a QR-based student check-in system using React Native and Laravel, improving attendance tracking efficiency.
- **Small Town Lottery System** - Delivered a full-featured lottery management platform consisting of a mobile application (React Native) for field agents and a Laravel-based web dashboard for administrators. The system enabled real-time ticket validation, result publishing, agent management, and secure access controls for various user roles.

## EDUCATION

### BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

University of Mindanao

2017 - 2024

# WORK EXPERIENCE

## FULL STACK WEB DEVELOPER

Freelance

February 2024 - March 2025

- Contracted by a Canadian taxi company to build a complete web-based reservation and driver management system tailored for dispatch operations.
- Developed a responsive, user-friendly public-facing web form using React and TypeScript for booking requests, including real-time scheduling and confirmation features.
- Created a robust admin dashboard using Laravel, Inertia.js, and React Native for managing reservations, driver assignments, schedule availability, and access control for admins and staff.

### Key Projects:

- **Bonjour Taxi Webform** - Built with React and TypeScript, this web app allowed users to book rides, select destinations, and receive real-time confirmations.
- **Bonjour Taxi Dashboard** - A secure and mobile-responsive dashboard built using Laravel, Inertia.js, and React Native to manage fleet operations, drivers, reservations, and admin roles.

## FULL STACK WEB DEVELOPER

Ishtar29 Residences and Realty Development

March 2024 - March 2025

- Developed a Real Estate Information System for a Philippine property developer to streamline internal workflows and data management.
- Built core modules to track available units, assign properties to clients, and generate digital contracts.

### Key Projects:

- **Ishtar29 Residences** - A web-based management system built with Laravel and Livewire for handling property availability, client assignments, and automated contract generation in a centralized platform.

## FULL STACK WEB DEVELOPER - INTERN

Department of Science and Technology Region XI

February 2024 - May 2024

- Lead the development of an Assets and Information Management System for DOST, to digitize asset tracking, transfers, and disposal processes.
- Consulted with regional directors and officials to gather requirements and ensure the system was aligned with operational needs across departments.

### Key Projects:

- **DOST Assets and Information Management System (AIMS)** - A custom-built internal platform developed with Laravel and Livewire, designed through direct consultation with DOST leadership to modernize and streamline the asset lifecycle management process.

# WORK EXPERIENCE

## FULL STACK WEB DEVELOPER

Freelance

September 2023 - January 2024

- Developed a Restaurant Tipping Service System for a Philippine startup, enabling restaurants to process digital tips securely and efficiently.
- Implemented features such as automatic voucher generation, real-time tipping notifications, and user role management.

### Key Projects:

- **GatchaDeals!** - A Laravel-based platform designed to streamline the tipping process with digital voucher generation and automated alerts.

## FULL STACK WEB DEVELOPER / MOBILE DEVELOPER

Advanced InfinIT Technology Solutions Inc.

September 2021 - September 2023

- Developed and maintained custom systems and web applications for schools and private companies using Laravel and Bootstrap.
- Designed scalable backend architectures and integrated RESTful APIs to support both web and mobile platforms.
- Built and maintained multiple mobile applications using React Native, handling backend development in Laravel to ensure consistent, real-time functionality across devices.
- Implemented features such as secure user authentication, dashboard analytics, and real-time data synchronization.

### Key Projects:

- **DOST SalikLakbay** - A solutions mapping and data collection mobile application built with React Native and Laravel, designed for researchers to record and submit findings from fieldwork.
- **LMS v2** - A mobile-first Learning Management System developed for educational institutions, with offline access support and backend APIs built in Laravel and React Native.
- **Yeet** - A digital wallet app with NFC-based peer-to-peer transactions and real-time processing, built using React Native and Laravel.
- **DigiConnect** - A digital business card app that allowed users to instantly share and manage their contact information using QR codes, built with React Native and a Laravel backend.
- **Maria Homes Real Estate Information System** - A real estate information system that allowed users to browse, search, and filter real estate listings, built with Laravel.
